

Open your dreams... and find your style

Nowadays, we live in a constant rush, trying to find peace, beauty, and a safe refuge at home and other places where we spend our time. A sense of security and harmony improves the everyday quality of life. INVADO understands and respects those needs. Being one of the most rapidly developing manufacturers of door joinery and skirting boards in Poland, we do our best to give you products that meet your needs, with high, individual aesthetics, and the best possible functional features. Our market position is built on over thirty years of experience and continuous investment in technology, people, and quality improvement.

24 months of warranty
on INVADO products

Quality above all

The belief that quality is of the utmost importance remains the common denominator of the design phase and the entire production process at INVADO. This is confirmed, among others, by the ISO 9001 Certificate, which ensures that all our products meet high European standards. The guarantee of the quality of products and services, in addition to the price and timeliness of deliveries, is the basic goal of the company, enabling it to be perceived as a trusted partner.

INVADO Technology

Production of door leaves and door frames is the strongest point of our INVADO offer, therefore the implementation of innovative production technology of foiled doors (INVADO Technology) became a breakthrough in the Company's activity. The most distinct feature of this technology is foiling surfaces without connecting foil on rebate edges. Because of this method, the edge of a door leaf looks aesthetically clean and is also more resistant to damage. It's very unlikely to break off the foil because it ends in the inner corner of the rebate—invisible to the eye. "Technology of foiling flat doors in the mass production system" has been in use since 2007 when it comes to all foiled doors. In addition—off-rebate foiling creates rounded edges in INVADO door leaves, safe for the hands of adults and children. Nowadays, thanks to the innovative method of door production, INVADO is among the most technologically advanced companies in Europe.

Hygienic certificates

Hygienic certifications aim to prevent materials and products hazardous to health and life to be introduced to the public or limit the acceptable range and application methods to eliminate health risks. All INVADO products have hygienic certificates:

- interior door frames in artificial veneer No. **441/322/451/2017**
- interior door leaves in artificial veneer or flat lacquered No. **348/322/353/2020**
- skirting boards in artificial veneer No. **256/322/261/2019**

Technical Approvals and National Technical Assessments

Technical Approvals and National Technical Assessments, issued by the Building Research Institute, are decisions that grant the use of building materials and products. In accordance with the Construction Products Act of April 16th 2004, as amended (unified text: Journal of Laws of 2016, item 1570), the products to which the Technical Approvals and National Technical Assessments relate, may be placed on the market and can be used in construction. INVADO Company assessed and verified the constancy of performance, made a national declaration of performance, and labeled the products with a construction mark in accordance with applicable regulations. INVADO's Technical Approvals and National Technical Assessments:

- Interior flat and glass doors—**ITB-KOT-2017/0313** edition 2;
- Modular interior doors—**ITB-KOT-2017/0003** edition 2;
- Folding, swinging, and sliding interior doors—**ITB-KOT-2018/0296** edition 1;
- Technical doors GUARDIA EI₂30 and EI₂60 (wooden interior entrance doors of HALSPAN system)—**ITB-KOT-2018/0407** edition 1; National Certificate of Stable Performance **AC 158-UWB-W1355**;
- Technical doors IGNIS—National Certificate Of Stable Performance **AC 158-UWB-W3479**;
- Interior entrance doors EGIDA with increased resistance to breaking-in—**ITB-KOT-2018/0598** edition 1;
- Adjustable door frames for interior doors—**ITB-KOT-2019/1221** edition 2;
- Block door frames for interior doors OB3 type P—**ITB-KOT-2017/0312** edition 2;
- Door frames SARA-PRO for interior doors—**ITB-KOT-2019/1076** edition 1;
- Metal door frames—**ITB-KOT-2021/2091** edition 1;
- Housing system for metal door frames—**ITB-KOT-2019/1221** edition 1.

CERTIFICATES AND AWARDS

BRAND OF THE DECADE 2009–2019 GOOD BRAND 2019 and 2021

An independent group of experts confirmed that products bearing the INVADO logo are characterized by: quality, trust, and reputation, awarding our company the title of BRAND OF THE DECADE 2009-2019 and the titles of GOOD BRAND 2019 and GOOD BRAND 2021. We would like to thank our customers for the trust you place in us by choosing INVADO doors for their dream interiors, our Business Partners for fruitful cooperation, recommending, and support, and all INVADO Employees for jointly building a good brand at every stage of its creation. We are incredibly grateful that our hard work is appreciated and we look forward to the future with pride.

CONSUMER'S LAUREL

INVADO brand has been recognized by Polish consumers and honored with the prestigious Consumer's Laurel emblem.

VOC

The VOC certification tests the emission of volatile organic compounds released from the facility and, depending on the results obtained, the tested sample is assigned a class, ranging from A+ (best) to C (worst). The possession of the VOC certificate confirms that the product does not release harmful to health substances inside the house, such as formaldehyde and benzene—carcinogenic elements that unfortunately are often contained in paints, and materials used on windows.

ISO 9001

The INVADO Company applies to the Quality Management System and fulfills the requirements of PN-EN ISO 9001 in the scope of designing, production, and sale of furniture components and finishing profiles, interior doors made of wood and wood-based materials, and technical doors.

FSC™

Control of Product Origin and environmental protection are the leading elements of INVADO's development strategy. This is confirmed by an international certificate issued by the Forest Stewardship Council™ and obtained by the company in 2007.

Ask for FSC™ certified products in our range.

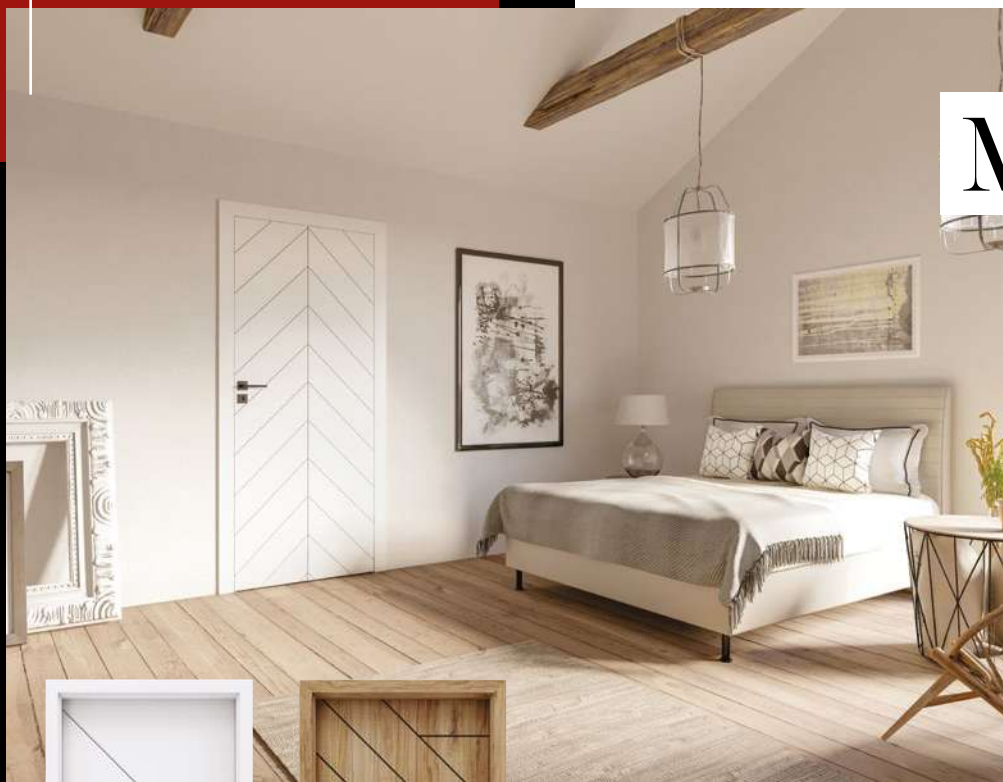

CERTIFICATE RESOURCES SAVED

INVADO has obtained the international certificate in waste management and recycling issued by INTERSEROH zero waste solutions.

AVANT-GARDE STYLE

MILLED

DOORS

We invite you to interiors inspired by **INVADO milled doors**. We present a harmonious combination of classics and modern design solutions—the **Belgatto** and **Decorato** collections. Mills—previously associated rather with classic design—have gained a completely new, fresh character, thanks to our designers. We recommend them for interiors where there is no room for boredom and clichéd arrangement ideas.

COLLECTION OF **FOILED** DOORS

FOILED AND MODULAR DOORS

FOILED DOORS

Visually, **foiled doors** are lighter than modular ones, which is combined with their stability. Their construction is a frame made of MDF board with a "honeycomb" or tubular chipboard (charged extra) filling. The frame with the filling is covered with a 3 mm-thick HDF board from both sides and wrapped with a decorative foil. The glazing beads of different profiles are used to hold the filling elements in these doors.

16 DOOR collections **40** colours of VENEERS **88** LEAVES in total

SAFE DESIGN
depending on the collection, rounded "soft" edges or sharp "cut edges"

www.invado.pl

MODULAR DOORS

Construction of **modular doors**: two vertical elements, upper and lower horizontal elements. Filling: MDF panels of different thicknesses or glass 4 mm-thick. For each model you can select a decorative foil. Glass and other filling elements in these door leaves are not installed using glazing beads, but with all the construction elements at once, which greatly improves their stability.

21 DOOR collections **24** colours of VENEERS **110** LEAVES in total

RESISTANCE TO LOAD
2 or 3 (starting from width "90")
screw-in pivot hinges

The edge of a **rebated door** leaf is finished with a rebate (visible in the picture A1) that overlaps a door frame when the door is closed. Door leaves made this way do not fit flush with a door frame.

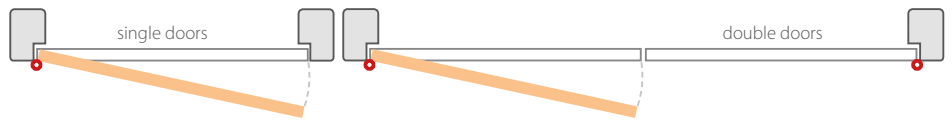

The edge of a **non-rebated** door leaf has a flat surface. Door leaves made this way fit flush with a door frame (A2).

LEFT AND RIGHT DOOR

Before buying doors, it is worth considering in which direction they should open. For safety reasons, bathroom or kitchen doors should be installed in a way that makes it possible to open them outwards. In other areas, it is dependent on users' preference and the layout of the apartment or house.

The next step is to determine what kind of doors we are looking for; right or left doors. What does that mean? If the hinges are installed on the right side of a door frame, it means we need a right door, if the opposite—we have to choose the left door. Therefore, before going to the store it is worth reconsidering this question and writing down a list of needed right and left doors and to determine the opening direction for each of them.

LEFT DOOR

RIGHT DOOR

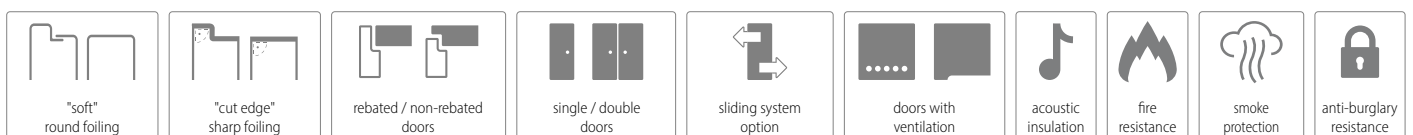

DOOR PRICE CALCULATION

In most cases, the quoted prices are for a door leaf without a door frame and door handles. To obtain the full price of the door set, you have to use the following calculation:

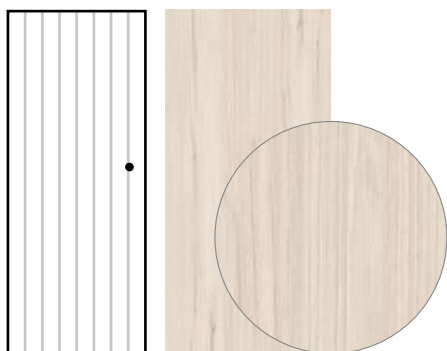

LEGEND

Please note the annotations marked with the following icons. They contain important information related to the door leaf models.

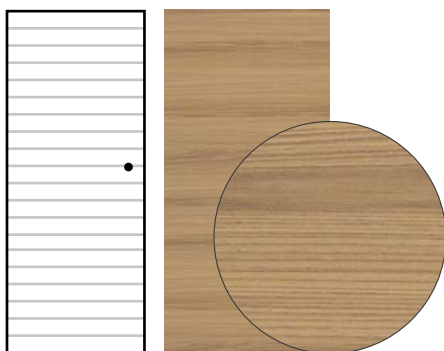

FOIL-TYPES OF WOOD TEXTURE (GRAINING)

Structures of INVADO foils can be divided into 3 categories:

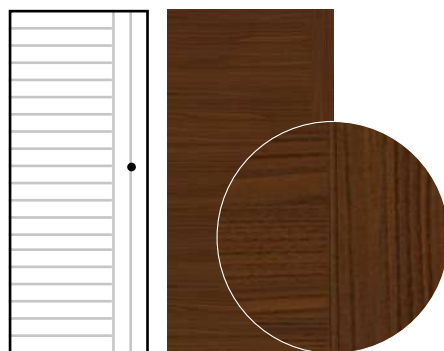

UNIDIRECTIONAL FOIL WITH VERTICAL TEXTURE:

Most INVADO foils are available in this type of texture. Exceptions: **Chestnut** (ENDURO), **Italian oak**, and **Severo oak** (ENDURO 3D).

UNIDIRECTIONAL FOIL WITH HORIZONTAL TEXTURE:

Currently, there are two foils with this texture in the INVADO offer. These are: **Italian oak** and **Severo oak** (ENDURO 3D).

BIDIRECTIONAL FOIL WITH VERTICAL AND HORIZONTAL TEXTURE:

The combination of two previous types of texture. There is one foil of that type in the INVADO offer—**Chestnut** (ENDURO).

www.invado.pl

DOOR EDGE COLOUR

OPTIMO

duo line

Due to the manufacturing technique, for doors from the OPTIMO LINE collection, it is possible to use the edge of the leaf in a different colour than its surface. The base for creating unique creations is the edge in the colour: pure black, alpine white, or natural Hamilton oak in combination with the OPTIMO LINE colour palette (p. 13)

DOOR EDGE COLOUR	DOOR COLOUR
B726 pure black	COLOUR PALETTE FOR OPTIMO LINE (p. 13)
B688 alpine white	COLOUR PALETTE FOR OPTIMO LINE (p. 13)
B717 natural hamilton oak	B687, B688 alpine white (p. 13)

One of the most popular models of INVADO doors—DESTINO UNICO—has been awarded a "Gold Medal". These door leaves make a bold combination of colours which allows the creation of intriguing, stylized interiors.

Therefore, we did not doubt that this was the most suitable collection to be submitted to the prestigious "Gold Medal" contest, held at the International Poznań Fair BUDMA. The IPF "Gold Medal" is one of the most recognizable awards in the Polish market, which is given to innovative products of the highest quality. We are proud of this achievement and we would like to thank all those involved in the production and sales of our Destino Unico doors.

CONSTRUCTION

- 1** filling element: panel or glass, depending on the model (4 mm thick)
- 2** filling element: 22 mm thick panel
- 3** the frame is made of an MDF board

MODERN AND OPTIMO

LINE

To meet the needs of the market and our most demanding customers, we present six collections of door leaves made in the technology of sharp edge veneering (90°)—**CUT EDGE**.

The **MODERN LINE** collection is available in selected, solid veneers from the standard offer, thanks to which the door can be matched to the interior dedicated to it.

OPTIMO LINE, in addition to the new, unique colours, also offers the possibility of using the edge of the door leaf in a different colour.

ADDITIONAL OPTIONS

- handle + QUEBECK shield—anti-burglary resistance class II (color INOX and TITAN)
- handle + ROYAL shield—anti-burglary resistance class III (color INOX)
- set of WILKA cylinder lock inserts (insert + insert with a knob), ANTI-BURGLARY resistance class 2, 30 x 40 mm, 6 keys
- panoramic viewfinder
- automatic door bottom seal for doors "80"–"100"

NOTE: automatic bottom door seal is not applicable for doors with fixed threshold, therefore it is not included in the set.

STANDARD EQUIPMENT

- multipoint strip lock with 3 security bolts
- 3 reinforced hinges + 3 anti-burglary pins
- acoustic insulation $R_w = 29$ dB (acoustic insulation class $R_w = 27$ dB)
- ANTI-BURGLARY resistance class RC2
- fixed aluminium threshold

DEDICATED DOOR FRAMES

[KOB A]—block door frame: 90 x 44 mm made of plywood covered with MDF board—width "80"–"100"

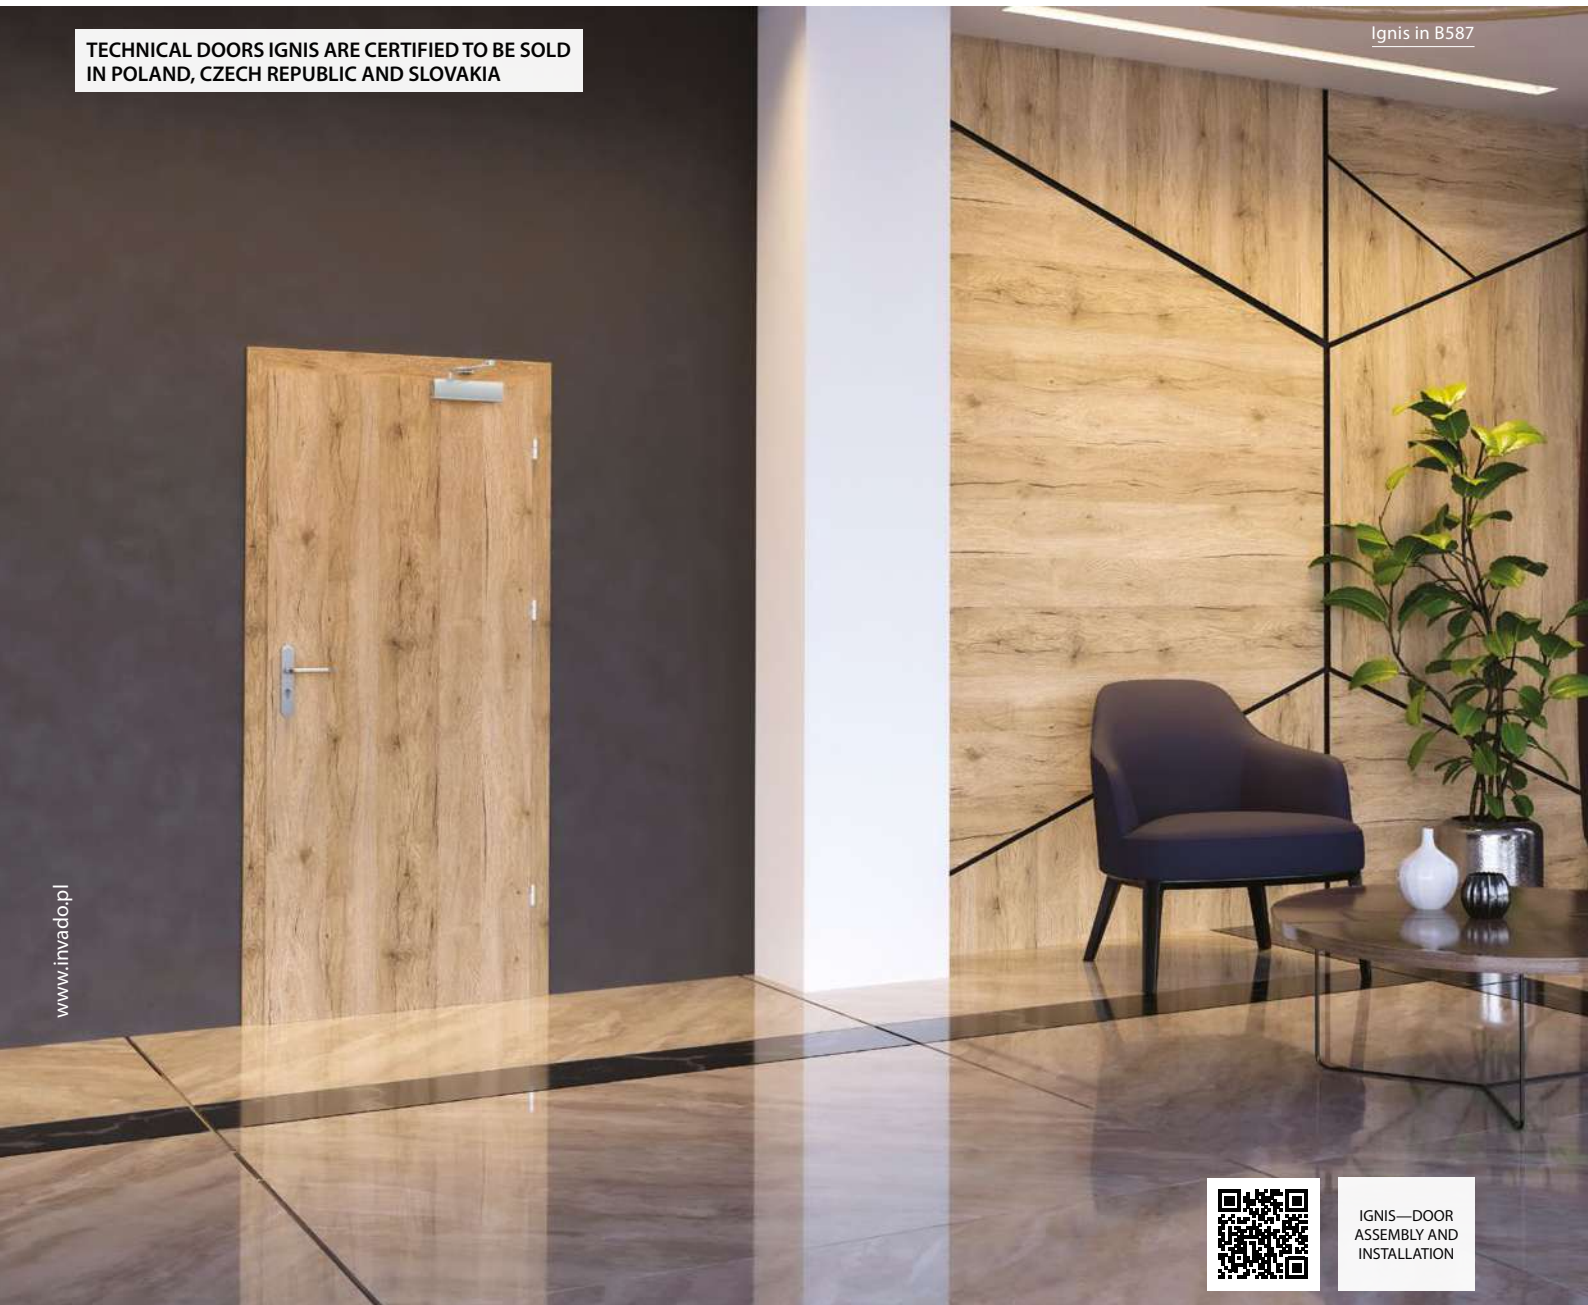

[KOB M]—metal door frame in RAL color: available as standard in brown color (8017) other colors—honey (8003), white (9010), beige (1001) and grey (7047)*—width "80"–"100"

*ATTENTION: Metal door frame in non-standard decors are available per request with longer production time.

TECHNICAL DOORS IGNIS ARE CERTIFIED TO BE SOLD IN POLAND, CZECH REPUBLIC AND SLOVAKIA

Ignis in B587

www.invado.pl

IGNIS—DOOR ASSEMBLY AND INSTALLATION

Ignis fire doors are flush, rebated, and single door leaves with fire resistance **EI₂ 30**. The door frame is made of non-flammable chipboard. The door leaf and the door frame can be installed in a firm fixing structure with minimal thickness 115 mm and minimal density 575 kg/m³, according to **PN-EN 13501-2:2016-07**. It is acceptable to mount the object in a structure that consists of:

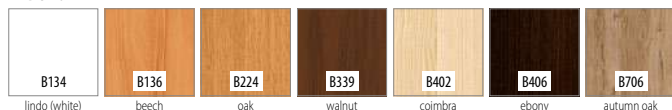

- pillar profiles with nominal density from 40 to 55 mm,
- a type F plasterboard on each side, each 12.5 mm thick,
- mineral wool 40-50 mm thick and with density 30-60 kg/m³.

Fire doors should be a subject of technical inspections and maintenance operations in accordance with the rules set out in the applicable standards and regulations on fire-resistance doors. Technical and maintenance inspections should be carried out at least once a year.

The doorset is supplied with:

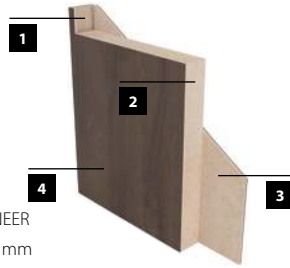

- a cylinder insert according to requirements of PN-EN 1303:2015-07,
- a self-closer according to requirements of PN-EN 1154:1999 / AC: 2010P,
- a complete door handle according to requirements of PN-EN 1906:2012,
- a closing sequence controller according to requirements of PN-EN 1158:1999 / AC: 2006P (for double doors only).

NOTE: the seller is obligated to sell technical doors equipped with above elements (at extra charge)

CONSTRUCTION

- 1 coating: finger joint pinewood
- 2 filling: fireproof chipboard
- 3 frame with filling is covered with HDF boards on both sides
- 4 door leaf covered with ENDURO foil or ECO-VENEER
 - door leaf thickness: E₁ 30—50 mm / E₂ 60—60 mm
 - cut edges (90°) of the door leaf (more info on p. 122)
 - width of single doors: "70"—"100"
 - width of double doors: "140"—"200"

ADDITIONAL OPTIONS

- viewfinder
- smoke protection
- set of 8 mounting screws with expansion sleeves in sizes 10/152 for brick walls

STANDARD EQUIPMENT

- cylinder lock insert
- 4 hinges with regulation
- intumescent seals
- automatic bottom door seal

NOTE: automatic bottom door seal is not applicable for doors with fixed threshold

ONLY SOLD TOGETHER WITH

- cylinder lock
- UNO door handle
- door closer meeting the requirements of PN-EN 1154:1999/AC:2010P (single door)
- closing sequence controller (double door)
- TS5000 door closer meeting the requirements of PN-EN 1154:1999/AC:2010P (single door with smoke protection)

NOTE: the seller's obligation is to sell technical doors equipped with the above elements

VENTILATION

According to the norm, the door to the bathroom, shower, and separate WC should open outwards, have a passage width of at least 0.8 m and height of 2 m, and have ventilation holes for the air supply in the bottom of the door with total ventilation area of at least 0.022 m². The total ventilation area is the sum of the gap under the door (standard 7 mm) and additional solutions that increase the total net ventilation area such as ventilation sleeves, ventilation undercut, and ventilation grid. The use of a ventilation grid ensures the correct ventilation area for all door widths, while using the sleeve and/or undercut the increased gap between the door and the floor should be used to meet the required regulations. If the regulations mentioned above must be obliged, the clients must trim the door on their own.

NOTE: THE D'ARTAGNAN DOOR LEAVES CANNOT BE USED WITH VENTILATION SLEEVES, UNDERCUTS AND GRIDS. THE SLIDING LEAVES MEET THE VENTILATION REQUIREMENT DUE TO THE SYSTEM CONSTRUCTION. INVADO DOES NOT MAKE SEVERAL VENTILATION SOLUTIONS AT THE SAME TIME.

GUIDELINES FOR BUILDINGS EQUIPPED WITH A RECUPERATION SYSTEM

To ensure adequate airflow from the living areas to the corridor, sanitary, and auxiliary rooms, it is recommended that all internal doors should have a gap at the bottom. The gap area in doors in living and auxiliary rooms should be at least 80 cm² (INVADO doors with an undercut fully meet this requirement). The size of the ventilation gap in doors in sanitary rooms should be 200 cm².

DOOR FRAMES

Block door frame

FOR REBATED DOORS [OB3]

CONSTRUCTION

- MDF board
- foiling—all decors available in the INVADO offer

Adjustable door frame

FOR NON-REBATED DOORS [ORS7 / ORS10]

CONSTRUCTION

- MDF board
- foiling—all decors available in the INVADO offer
- the standard adjustable door frame consists of a central element plus 2 sets of angle architraves joined at 45° (ORS7 i ORS10) or 90° (ORS4). A standard angle architrave consists of a flat architrave 60 mm-wide and a "tongue" 30 mm-long. It is possible to separately order a set of angle architraves 80 mm-wide and/or a set of angle architraves 80 mm-wide with a "tongue" 50 mm-long (see table of options at extra charge).

DOOR FRAME FOR DOOR LEAVES IN WIDTH

- width of single doors "60" to "100"
- width of double doors "120" to "200"

OPTIONS AT EXTRA CHARGE

- door frames with sidelights and transoms (without glass) with circumference up to 5 l.m
- door frames for double doors
- additional hinge in door frame
- standard angle architrave (a "tongue" 30 mm-long, an architrave 60 or 80 mm-wide)
- angle architrave with longer "tongue" (a "tongue" 50 mm-long, an architrave 60 or 80 mm-wide)

RANGES OF WALL THICKNESS COVERING

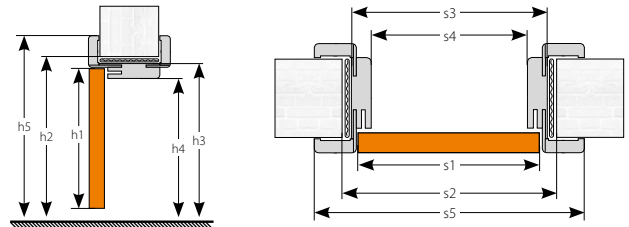

Door frame for wall thickness from 360 mm

DOOR FRAME WIDTH MODIFICATION

The adjustable door frame is made in dimensions adjustable to the wall thickness in steps of 20 mm. The minimum wall thickness is 75 mm.

NOTE: for wall thickness between 75–85, it is required to use wall frame A(75–94). In this case, the angle architrave should be trimmed where the mills are located—otherwise, the door frame won't be properly aligned with the wall. Door frames for a wall thickness greater than 360 mm consist of at least two connected elements.

The SARA-PRO door frame introduces a brand new quality in interior decoration. Invisible to the naked eye, it makes the area lighter. Ideal for minimalist and modern interiors. Available in outer and inner versions.

Non-rebated door leaf for outer door frame and rebated door leaf for inner door frame is based on the NORMA DECOR 1 door leaf

NEW DECORS

ENDURO ••

ENDURO 3D ••

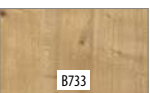

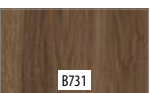

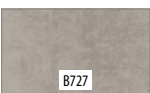

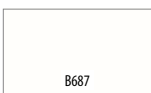

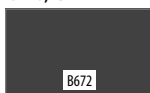

ENDURO PLUS ••

NOTE: It's possible to paint the SARA-PRO door frame with a wall paint after previously coating it with a primer paint included in the package.

CPL 0,15 MM ••••

CONCEALED DOOR FRAME SARA-PRO—INNER

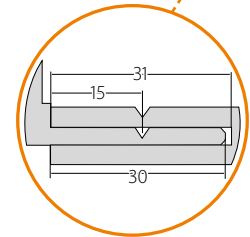

CONCEALED DOOR FRAME SARA-PRO—OUTER

- (A) door frame housing
- (B) metal door frame
- (C) aluminium angle element
- (D) gasket

FEATURES

Metal frame housing (covering) allows the installation of new doors in the rooms where metal frames were mounted following the Polish standard (regarding dimensions) without having to remove these frames. The advantage of this solution is an easy installation with mounting foam, without dirty floors and walls, and the ability to mount standard foiled INVADO door leaves.

WIDTH OF THE DOOR FRAME FOR DOOR LEAVES

- width of single doors "60" to "90"

INTERNAL DIMENSIONS OF METAL DOOR FRAME (MM)

		"60"	"70"	"80"	"90"
s1	door leaf width	600	700	800	900
h1	door leaf height	2025 (PL) / 1975 (CZ-SK)			

RANGES OF WALL THICKNESS

- 60–94, 95–129, 130–199, 200–269

Housing system for metal door frames for walls thicker than 130 mm has an additional enlarging element.

For the range of 130–199—the enlarging element is 85 mm-wide.
For the range of 200–269—the enlarging element is 155 mm-wide.
