*"If you  
can  
Dream it...*

### **With your needs in mind.**

Nowadays we live in a constant rush, trying to find peace, beauty, and a safe refuge at home and in the places where we live. A sense of security and harmony definitely improves everyday quality of life. INVADO understands and respects these needs. Being one of the most rapidly developing manufacturers of door joinery and skirting boards in Poland, we do our best to give you products that meet your needs, with high, individual aesthetics and the best possible functional features. INVADO is also a leading supplier of components for the furniture industry—its market position is being built on the basis of over thirty years of experience and continuous investment in technology, people and quality improvement.

**INVADO**<sup>®</sup>  
doors

*...you can  
Do it*

## CERTIFICATES AND AWARDS:

### Quality above all

INVADO continually strives to ensure optimal quality of its products, taking into account our users' personal needs. Quality is paramount—it is the basic issue in the design phase and remains the common denominator for all production processes. ISO 9001 certificate provides such an approach to the issue of quality. All INVADO products meet European standards. The high level of products and services next to the price and delivery time is the Company's primary objective, ensuring its perception as a trusted partner.

### INVADO Technology

Production of door leaves and door frames is the strongest point of our INVADO offer, therefore the implementation of innovative production technology of foiled doors (INVADO Technology) became a major breakthrough in the Company's activity. The most distinct feature of this technology is foiling surfaces without connecting foil on rebate edges. Because of this method the edge of a door leaf looks aesthetically clean and is also more resistant to damage. It's very unlikely to break off the foil because it ends in the inner corner of the rebate—invisible to the eye. „Technology of foiling flat doors in the mass production system” is in use since 2007 when it comes to all foiled doors. In addition—off-rebate foiling makes the INVADO doors the only ones on the market to have rounded edges, safe for both adults and children's hands. Nowadays, thanks to the innovative method of doors' production, INVADO is among the most technologically advanced companies in Europe.

### Hygienic certificates

Certifications aim to prevent materials and products hazardous to health and life of its users to be introduced to the general use or limit the allowable scope and method of their application for the elimination of health risks. All INVADO products have hygienic certificates:

- interior door frames in natural veneer No. 48/322/49/2017
- interior door frames in artificial veneer No. 441/322/451/2017
- interior door leaves in natural veneer No. 46/322/47/2017
- interior door leaves in artificial veneer or flat lacquered No. 348/322/353/2020
- skirting boards in natural veneer No. 47/322/48/2017
- skirting boards in artificial veneer No. 256/322/261/2019

### Technical Approvals and National Technical Assessments:

Technical Approvals (until the end of their term) and National Technical Assessments, issued by Building Research Institute, are decisions to grant use of building materials and products. In accordance with the Construction Products Act of 16 April 2004, as amended (unified text: Journal of Laws of 2016, item 1570), the products to which the Technical Approvals and National Technical Assessments relate, may be placed on the market and can be used in construction. INVADO Company assessed and verified the constancy of performance, made a national declaration of performance and labeled the products with a construction mark in accordance with applicable regulations. INVADO's Technical Approvals and National Technical Assessments:

- Interior flat and glass doors—ITB-KOT-2017/0313 edition 1;
- Modular interior doors—ITB-KOT-2017/0003 edition 1;
- Folding, swinging and sliding interior doors—ITB-KOT-2018/0296 edition 1;
- Adjustable door frames for interior doors—ITB-KOT-2019/1221 edition 1;
- Block door frames for interior doors OB3 type P—ITB-KOT-2017/0312 edition 1;
- Door frames SARA-PRO for interior doors—ITB-KOT-2019/1076 edition 1;
- Metal door frame—ITB-KOT-2021/2091 edition 1;
- Housing system for metal frames—ITB-KOT-2019/1221 edition 1.

### CERTIFICATE RESOURCES SAVED

INVADO has obtained the international certificate in waste management and recycling issued by INTERSEROH zero waste solutions.

### GOOD BRAND 2019 AND 2021

An independent group of experts has confirmed that the products signed with the INVADO logo can be described using such words as: quality, trust and reputation. These three guidelines decide which selected brands are among the renowned brands. We are proud and grateful for that and at the same time we would like to thank our Customers for trusting us by choosing INVADO doors for your dream interiors, our Business Partners for the fruitful cooperation, recommendation, and support, and all our INVADO employees for building together a good brand at every stage of its creation.

### CONSUMER'S LAUREL

INVADO brand has been recognized by Polish consumers and honored with the prestigious Consumer's Laurel emblem.

### VOC

The VOC certification tests the emission of volatile organic compounds released from the facility and, depending on the results obtained, the tested sample is assigned a class, ranging from A+ (best) and C (worst). The possession of the VOC certificate confirms that the product

does not release harmful for health substances inside the house, such as formaldehyde and benzene, a carcinogenic elements that unfortunately are often contained in paints, and materials used on windows.

### ISO 9001

The INVADO Company applies to the Quality Management System and fulfills requirements of: PN-EN ISO 9001 in scope of: designing, production and sale of furniture components and finishing profiles, interior doors made of wood and woodbased materials and technical doors.

### FSC®

Control of Product Origin and environmental protection are the leading elements of INVADO's development strategy. This is confirmed by an international certificate issued by the Forest Stewardship Council® and obtained by the company in 2007.

Ask for FSC® certified products in our range.

The mark of responsible forestry

## FOILED AND MODULAR DOORS:

### FOILED DOORS

Visually, **foiled doors** are lighter than modular ones, which is combined with their stability. Construction: frame made of MDF board or finger joint pinewood. Filling: "honeycomb" or tubular chipboard, which is charged extra. The frame with filling is covered with a 3 mm-thick HDF board from both sides and wrapped with a decorative foil. For installation of filling elements in these doors, the glazing bars of different profiles are used.

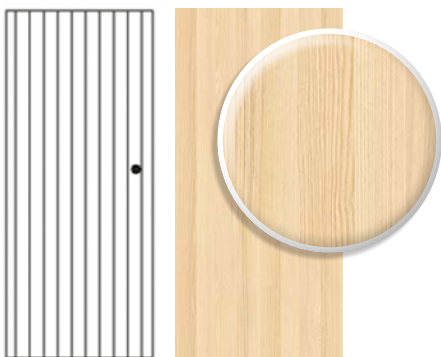

### MODULAR DOORS

Construction of **modular doors**: 2 vertical elements, upper and lower horizontal elements. Filling: MDF panels of different thickness or glass 4 mm-thick. For each model you can select a decorative foil. Glass and other filling elements in these door leaves are not installed using glazing bars, but with all the construction elements at once, which greatly improves their stability.

## FOILS—TYPES OF WOOD TEXTURE (GRAINING):

Structures of INVADO foils can be divided into 3 categories:

### UNIDIRECTIONAL FOIL WITH VERTICAL TEXTURE:

Most of INVADO foils is available in this type of texture. Exceptions: Chestnut (ENDURO), Italian oak and Severo oak (ENDURO 3D).

### UNIDIRECTIONAL FOIL WITH HORIZONTAL TEXTURE:

Currently in INVADO offer there are two foils with this texture. These are: Italian oak and Severo oak (ENDURO 3D).

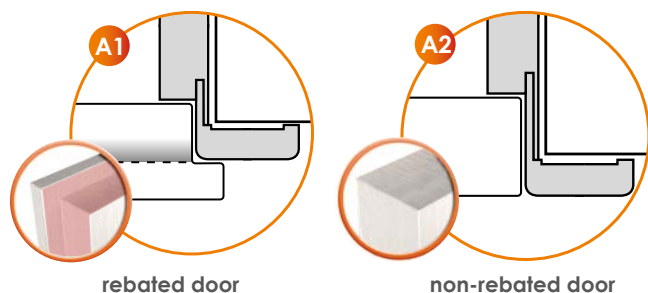

### BIDIRECTIONAL FOIL WITH VERTICAL AND HORIZONTAL TEXTURE:

The combination of two previous types of texture. There is one foil of that type in the INVADO offer—Chestnut (ENDURO).

All 3 types of foils can be applied to foiled doors only. In case of modular doors, due to different construction, the texture direction of vertical and horizontal elements is different.

### REBATED AND NON-REBATED DOORS:

The edge of a **rebated door** leaf is finished with a rebate (visible on the picture A1) that overlaps a door frame when the door is closed. Door leaves made this way do not fit flush with a door frame.

The edge of a **non-rebated door** leaf has no additional finishing, i.e. it has a flat surface. Door leaves made this way fit flush with a door frame (A2).

### LEFT AND RIGHT DOOR:

#### left door

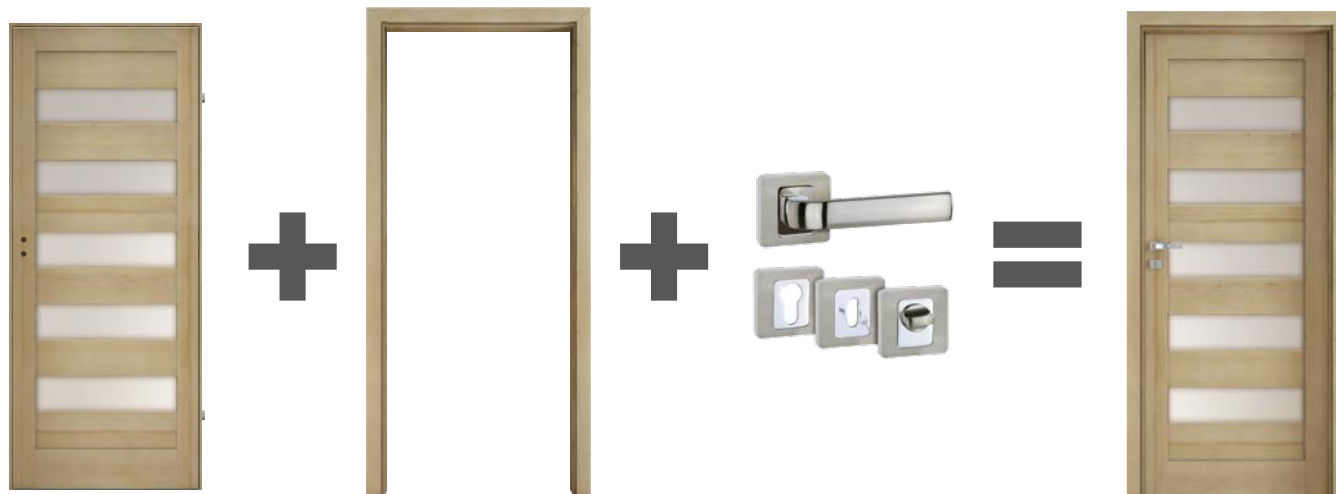

#### right door

Before buying a door, it is worth considering which direction it should be opening in. For safety reasons, bathroom or kitchen door should be installed in a way that makes it possible to open it outwards. In other areas, it is dependent on the users' preference and the layout of the apartment or the house. The next step is to determine which door we are looking for: right or left. What does it mean? If the hinges are installed on the right side of a door frame, that means we need a right door, if the opposite—we have to select the left door. Therefore, before going to the store it is worth to reconsider this question and write down a list of needed right and left doors, and to determine the opening direction for each of them.

### CALCULATION OF THE PRICE OF THE DOOR:

In most cases, the quoted prices are of a door leaf without a door frame or door handles. In order to obtain the full price of the door set, you have to use the following calculation:

door leaf price

+

door frame price

+

handle price

=

door set price

### ENDURO PLUS foil

### ECO-VENEER FORTE

### ECO-VENEER CPL

### ENDURO POLI foil

Only available as a door frame colour for:

- BLOCK DOOR FRAMES,
- ADJUSTABLE DOOR FRAMES,
- ADJUSTABLE DOOR FRAMES FOR NON-REBATED MODULAR DOORS

## CONSTRUCTION

- filling element: 22 mm-thick panel
- filling element: panel or glass, depending on the model (4 mm-thick)
- the frame is made of MDF board
  - upper part of the frame is 350 mm high, lower part of the frame is 400 mm high
- door leaf covered with ENDURO foil or ECO-VENEER
  - side edges and upper edge are foiled
  - rounded vertical edges of door leaves (**more info on page 86**)
  - in case of double doors, there is a covering strip (**drawing on page 86**)
  - width of single doors: "60"- "100" / width of double doors: "120"- "200"

## STANDARD EQUIPMENT FOR REBATED DOOR LEAVES

- lock 72 mm for a standard key, a WC knob, or a cylinder lock insert
- screw-in pivot hinges 13,5/9 (white zinc)—2 pcs for door leaves in sizes "60"- "80", 3 pcs for door leaves in sizes "90" and "100"

## STANDARD EQUIPMENT FOR NON-REBATED DOOR LEAVES

- magnetic lock 90 mm for a standard key or a WC knob, 85 mm for a cylinder lock insert
- hidden hinges with a 3-D regulation in the color CHROME/MATT

## ADDITIONAL OPTIONS CHARGED EXTRA

- door without a key hole no extra charge
- door width "100"
- additional hinge for the door in sizes "60"- "80"
- additional hinge for non-rebated door—included in a door frame door frame additional options—page 89
- caps for hinges (chrome, satin chrome, golden, black)
- ventilation undercut
- PVC ventilation sleeves
- metal ventilation sleeves, round (chrome, golden)
- metal ventilation sleeves, square (chrome, nickel)
- door made in a non-rebated version for sliding systems
- door made in a non-rebated version
- double door
  - cylinder lock insert 31/36 (31/31 in non-rebated door leaves)
  - automatic bottom door seal, widths "60"- "100"
  - aluminum thresholds, widths: "60"- "100"

## AVAILABLE GLASS (THE GLOSSY SIDE OF GLASS IS ON THE HINGE SIDE)

- satinato—tempered glass standard—no extra charge

One of the most popular models of INVADO doors—DESTINO UNICO—has been awarded a “Gold Medal”. These door leaves are a bold combination of colors, that allows to create intriguing, stylized interiors.

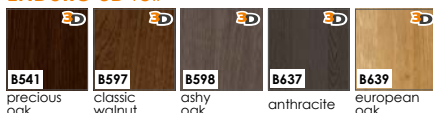

Therefore we had no doubt, that this is the collection to be submitted to the prestigious “Gold Medal” contest, held at the International Poznań Fair BUDMA. The IPF “Gold Medal” is one of the most recognizable awards in the Polish market, which is given to innovative products of the highest quality. We are proud and we thank to all those involved in the production and sale of doors Destino Unico.

## Ventilation

According to the norm, the door to the bathroom, shower and separate WC should open outwards, have the passage width of at least 0.8 m and height of 2 m, and have the ventilation holes for the air supply in the bottom of the door with total ventilation area of at least 0.022 m<sup>2</sup>. The total ventilation area is the sum of the gap under the door (standard 7 mm) and additional solutions that increase the total net ventilation area such as: ventilation sleeves, ventilation undercut and ventilation grid. The use of ventilation grid ensures the correct ventilation area for all door widths, while using the sleeve and/or undercut the increased gap between the door and the floor should be used in order to meet the required regulations. If regulations mentioned above must be obliged, the clients must trim the door on their own.

### GUIDELINES FOR BUILDINGS EQUIPPED WITH A RECUPERATION SYSTEM

To ensure adequate air flow from the living areas to the corridor, sanitary, and auxiliary rooms, it is recommended that all internal doors should have a gap at the bottom. The gap area in doors in living and auxiliary rooms should be at least 80 cm<sup>2</sup> (INVADO doors with an undercut fully meet this requirement). The size of the ventilation gap in doors in sanitary rooms should be 200 cm<sup>2</sup>.

# DOOR FRAMES

ORS1 / ORS8

## Adjustable door frame for rebated doors

ADJUSTABLE  
DOOR  
FRAME  
INSTALLATION

### CONSTRUCTION

- MDF board
- foiling—all decors available in the INVADO offer
- standard adjustable door frame consists of central element plus 2 sets of angle architraves joined at 45°. Standard angle architrave consists of a flat architrave 60 mm-wide and a "tongue" 30 mm-long. There is a possibility to order:
  - a) adjustable door frame with a flat angle architrave 80 mm-wide (ORS8).
  - b) a set of flat angle architraves 60 mm or 80 mm-wide with a "tongue" 50 mm-long (sold separately). See the table of options at extra charge.

### OPTIONS AT EXTRA CHARGE FOR ADJUSTABLE DOOR FRAMES

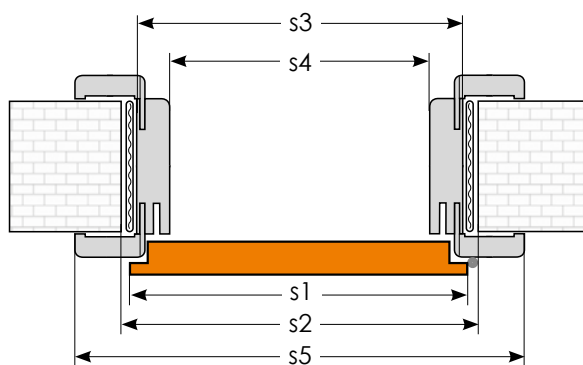

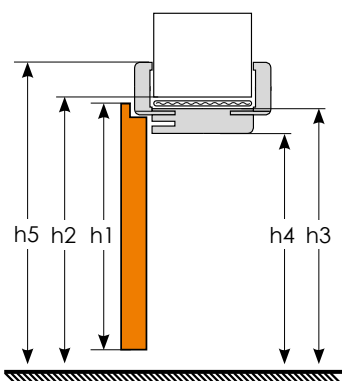

- door frames with sidelights and transoms (without glass) with circumference up to 5 l.m
- door frames for double doors
- additional hinge in door frame "60"- "80"
- standard angle architrave (a "tongue" 30 mm-long, an architrave 60 or 80 mm-wide)
- angle architrave with longer "tongue" (a "tongue" 50 mm-long, an architrave 60 or 80 mm-wide)
- wall framing ("blind door frame")

### DOOR FRAME FOR DOOR LEAVES IN WIDTH

- width of single doors "60" to "100"
- width of double doors "120" to "200"

### RANGES OF WALL THICKNESS COVERING

- Adjustable door frame is made in dimensions adjustable to the wall thickness in steps of 20 mm. The minimum wall thickness is 75 mm. **NOTE: due to special mills there is a possibility to trim the frame and reduce the wall thickness coverage by 15 mm.** Door frame for the wall thickness greater than 340 mm consists of at least two connected components.

- MDF board
- foiling—all decors available in the INVADO offer
- standard adjustable door frame consists of central element plus 2 sets of angle architraves joined at 45°. Standard angle architrave consists of a flat architrave 60 mm-wide and a "tongue" 30 mm-long. There is a possibility to order:
  - a) adjustable door frame with a flat angle architrave 80 mm-wide (ORS10)
  - b) a set of angle architraves 60 mm or 80 mm-wide with a "tongue" 50 mm-long (sold separately). See the table of options at extra charge

## OPTIONS AT EXTRA CHARGE FOR ADJUSTABLE NON-REBATED MODULAR DOORS

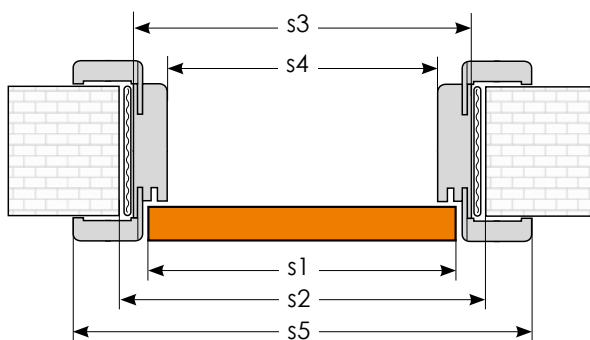

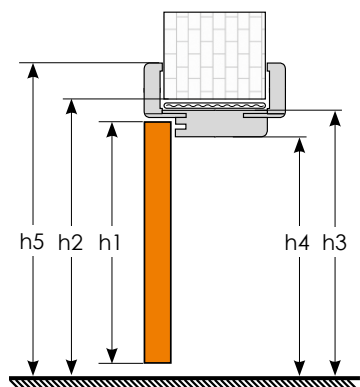

- door frames with sidelights and transoms (without glass) with circumference up to 5 l.m
- door frames for double doors
- additional hinge in door frame
- standard angle architrave (a "tongue" 30 mm-long, an architrave 60 or 80 mm-wide)
- angle architrave with longer "tongue" (a "tongue" 50 mm-long, an architrave 60 or 80 mm-wide)

## DOOR FRAME FOR DOOR LEAVES IN WIDTH

- width of single doors "60" to "100"
- width of double doors "120" to "200"

## RANGES OF WALL THICKNESS COVERING

- Adjustable door frame is made in dimensions adjustable to the wall thickness in steps of 20 mm. The minimum wall thickness is 75 mm. **NOTE: due to special mills there is a possibility to trim the frame and reduce the wall thickness coverage by 15 mm.** Door frame for the wall thickness greater than 340 mm consists of at least two connected components.

# Concealed door frame SARA-PRO

NON-REBATED DOOR LEAF FOR OUTER DOOR FRAME AND REBATED DOOR LEAF FOR INNER DOOR FRAME  
BASED ON DOOR LEAF NORMA DECOR 1

CONCEALED DOOR FRAME SARA-PRO—OUTER

The Sara Pro Door frame introduces a completely new quality in interior decoration. Invisible to the naked eye, it makes the area lighter. Ideal for minimalist and modern interiors. Available in outer and inner version.

**CONSTRUCTION**

- the frame is made of MDF board
- the surface and edges of a door leaf are primed and prepared for painting or wallpapering (painting and wallpapering on your own)
- filling—„honeycomb“ or tubular chipboard (optionally)
- frame with filling is covered with HDF boards on both sides
- width of single doors "60"—"90"

**STANDARD EQUIPMENT OF A DOOR LEAF**

- 2 hidden hinges
- magnetic lock for standard key, WC knob or cylinder lock insert

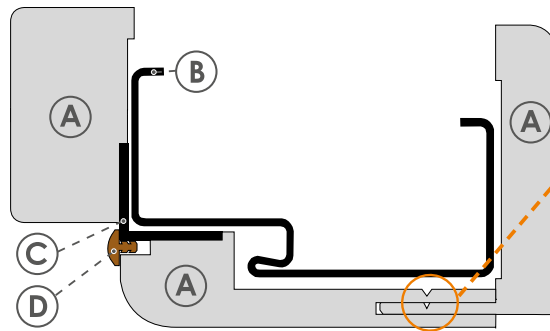

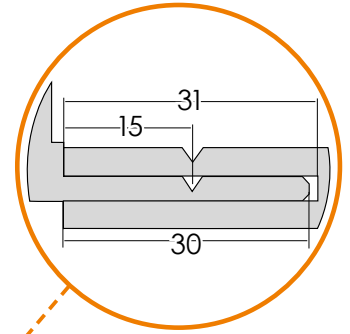

**ADDITIONAL OPTIONS AT EXTRA CHARGE**

- door without a key hole no extra charge
- ventilation undercut
- PVC ventilation sleeves
- cylinder lock insert 31/36
- filling—tubular chipboard
- automatic door bottom seal for door width "60"—"90"
- ventilation grid

**DIMENSIONS OF A DOOR LEAF AND CONCEALED DOOR FRAME**

ATTENTION:  
It's possible to paint SARA-PRO door frame with a wall paint after previously coating it with a primer paint included in the package

- (A) door frame housing
- (B) metal door frame
- (C) aluminium angle element
- (D) gasket

**FEATURES**

Metal frame housing (covering) allows to install new doors in the rooms where metal frames were mounted in accordance with the Polish standard (regarding dimensions) without having to remove these frames. The advantage of this solution is an easy installation with mounting foam, without dirty floors and walls, and the ability to mount a standard foiled INVADO door leaves.

**WIDTH OF THE DOOR FRAME FOR DOOR LEAVES**

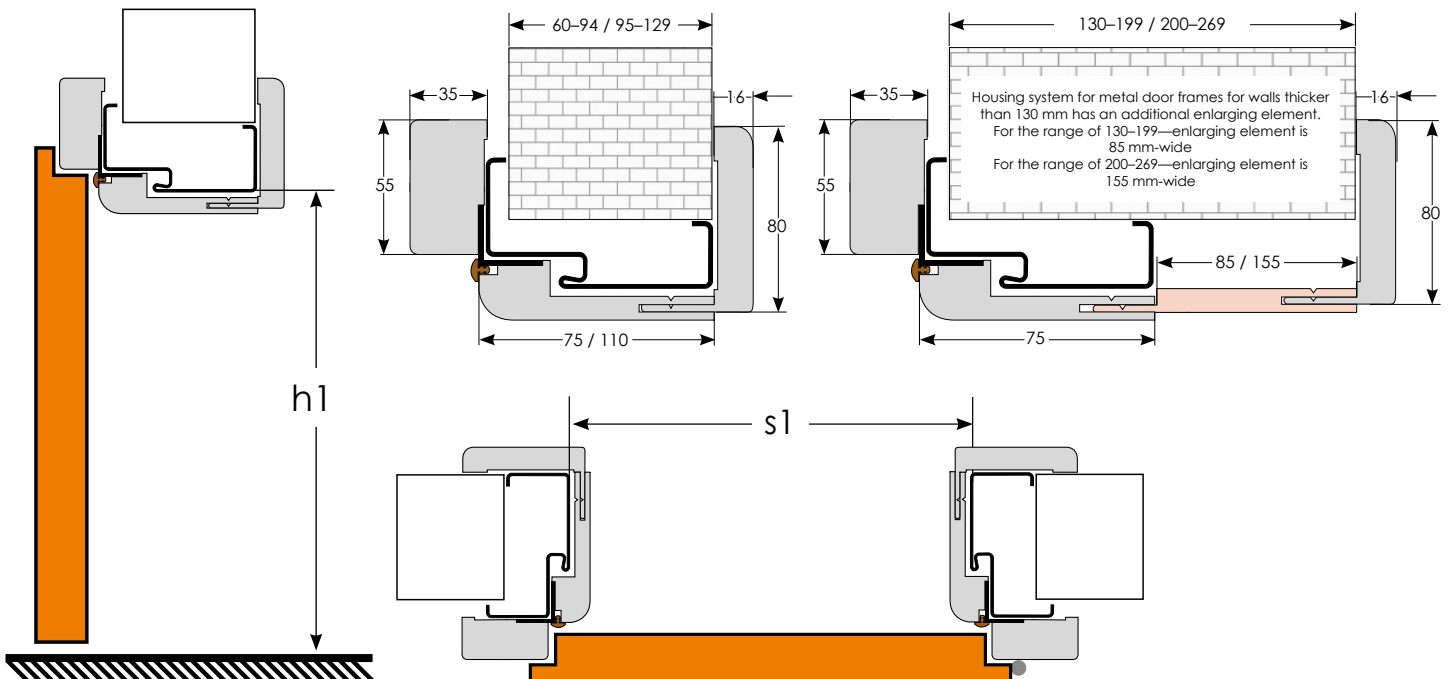

- width of single doors "60" to "100"

**RANGES OF WALL THICKNESS**

- 60-94, 95-129, 130-199, 200-269

**INTERNAL DIMENSIONS OF METAL DOOR FRAME (mm)**
